

BACHELOR IN "NURSING"

PROGRAM OBJECTIVES

The study program Bachelor in "Nursing" is organized in such a way that the student receives the appropriate training to achieve professional objectives in order to qualify and be employed as a general nurse. This study program aims to equip the student with concepts and general theoretical and practical knowledge, to prepare him/her for the profession or license through practical courses, applications, and laboratories, to involve the student in professional associations, and to enable him/her for career development and integration into the labour market.

LEARNING OUTCOMES

At the end of this program, the student will be able to:

- Integrate theories and concepts into nursing practice.
- Apply individualized care on the best respective evidence, patient values and clinical expertise.
- Access the need for continuous improvement in clinical practice, based on new knowledge and the latest nursing practice guidelines.
- Provide a quality, safe and effective nursing care for patients.
- Improve teamwork and communication skills with patients using terms they can easily understand.
- Use health information technologies, patient care and communication devices that support safe and effective nursing practice.
- Implement clinical prevention and health promotion interventions to provide patient-centered care and lifelong medical care.
