

BACHELOR IN "PHYSIOTHERAPY"

PROGRAMME OBJECTIVES

The study programme "Bachelor in Physiotherapy" aims to provide students with the ability to care for outpatients and inpatients on a personal level and based on up-to-date rehabilitation knowledge.

Students are taught how to approach with a professional behaviour in the field of physiotherapy, to have collaborative skills at multidisciplinary levels and to act in accordance with practices based on work plans and protocols based on scientific studies. This programme prepares students to be able to undertake professional activities that require accountability and are in accordance with ethical and deontological codes.

LEARNING OUTCOMES

By the end of this study programme, the student:

- Identifies, defines, and manages the problems of professional practice through critical, logical, and analytical thinking.
- Understands, analyses, and integrates complex information from the program content and applies to laboratories or real and stimulated patients.
- Practices professional and ethical responsibilities with a high level of trust, integrity, social interest, and multidisciplinary cooperation.
- Analyses and interprets the physical assessment, diagnosis, and proper setting of short-term and long-term objectives of the therapy.
- Selects and applies safely and efficiently rehabilitation strategies based on scientific data.
- Creates a safe rehabilitation plan and accurately documents its progress.
