HISTORY & THE FIRST DECADE

Since its founding, EUT has shown that it is the University of All - the students, the professors, of the neutral social and political actors, while being universally open to every person, path, idea, political spectrum, tendencies and social groups.

Mission of EUT: Integration in the society through dialog, ideas, projects, debates, through contributing as the engine of the economy with the creation of international networks, but also having the responsibility to engage in adding more values to the Albanian society.

Vision of EUT: Our distinctive approach towards research, education and innovation will inspire the community, professors, students, and further partners, leading them towards a society with a more functional knowledge for the benefit of society.

EUR, the contribution of EUT for social responsibility

During its second decade, EUT comes not only as an affirmed institution of higher education but also as a true symbol of what a university should be in a free democratic society; a space of opportunities and thoughts where everyone can find themselves. After 14 years of contribution in the history of higher education in Albania, EUT comes reformed, with a restructuring and expansion of its academic offer. The reason for these changes is precisely the desire to always be in the grip of development and quality. Reconceptualizing the current study programs and adding two new faculties is the next step that this university is taking to bring more quality to its student. Currently the faculties of EUT are 5, where two new faculties have been added to the three previous faculties, the Faculty of Technical Medical Sciences, and the Faculty of Engineering, Informatics and Architecture.

BOARD OF TRUSTEES

SELAMI XHEPA

Well-known figure and Professor of Economics. Professor Xhepa comes to this new position to continue an excellent tradition of the useful role of the President As part of the university's image and public communication.

SHEFQET MUÇI

Member of the Supreme Court and Minister of Justice in the Stability Government (1991). Then a lawyer and for a time president of the Tirana Lawyers Association and State attorney in the General Advocacy of the State.

MUSTAFA NANO

A prominent publicist and journalist, he has been part of the university for years, publishing several books and becoming part of various projects. A public voice that Actively supports humanities as a way of building the society.

LIDA MIRAJ

Postgraduate degree in Archeology and Ancient History of Albania; Doctor of Science in Archeology. Author of several books and scientific article, at home and abroad.

ISUF KALO

Founding Dean of the Faculty of Technical Medical Sciences at EUT, has contributed to the establishment of this faculty with a work that started about two years ago, by laying the foundation stone to the ambitious future of Faculty of Medical Sciences.

THE GREETING OF THE PRESIDENT

PRESIDENT OF EUT
PROF. ASOC. DR. SELAMI XHEPA

University —
a key pillar
to national
development

The knowledge society of the new century is transforming into a revolutionary way not only its understanding, but also the place and role of higher education institutions where knowledge is produced and is transferred to the society. This transformative process transcends the dimensions of the systematic changes that the education system in Albania experienced, as it is not only connected with the adaptation of a new model of education and creation of professional skills needed for the market. The whole model of education is evolving, although it is still not yet fully completed and often fails to comply with new paradigm that emerged in the last decades. It is a process upon which even universities that are at the frontiers of knowledge creation are reflecting and those who understand the importance of it more quickly and adapt to such changes are the winners. Private sector institutions have demonstrated to be more well-disposed and proactive to such changes. They have the flexibility, motivation, and ability to become a pioneer of more advanced experimentation and adoption. As always, the need for survival is a powerful motive for innovation and experimentation, and this makes a private university part of the solution to the challenges of higher education, not part the problem. European University of Tirana entered the second decade with new challenges. A reformed curriculum package closely aligned with the professional skills based on the student's choice, a diversification of professional formation in new areas of science and technology, thus creating a multidisciplinary environment, and above all, a comprehensive update of all curricula with the latest knowledge of the respective fields have placed the European University of Tirana in a highly competitive position in the higher education system of Albania. The Staff of EUT is highly motivated to embark on such challenges and in partnership with the society and communities, will firmly consolidate its image as a leading university in Albania.

THE GREETING OF THE RECTOR

EUT RECTOR
PROF. DR. TONIN GJURAJ

EUT – more than a university

To be the Rector of the European University of Tirana, a 15-year university in academic life in Albania, is a special responsibility, because EUT is already a consolidated institution, which has established its own tradition, that may not be very long, but almost as old as the private universities in the country.

This responsibility makes me say to students, parents and various social actors that following, cooperating or any other form of participation in an activity, project, or initiative that EUT undertakes in Albanian social life, is a guaranteed success. This success has, at least, five points of support: First, EUT has already a tradition of good practices of all kinds, which make this institution a living organism, respected, honored and referred by others. Second, EUT has a competent and stable academic staff, with a wide range of profiles, capable of imparting their competence in almost any field of development of country's life, or universal knowledge. Third, EUT means to be supported everywhere by a wide network of former graduate students - ALUMNI, who already reinforce the echo of this institution, of their studies, or a diploma they have received in this institution, as well as a social experience with more than 15000 graduates and more than 25000 in total, in terms of students, who in one way or another, have once been part of UET. The same can be said for the academic staff, where more than 1000 lecturers, full-time or part-time, with 15-year dynamics, have transmitted knowledge and exercised their competence at UET.

Fourth, quality assurance and enhancement is one of EUT's basic priorities, as a higher education institution, even its most important challenge. Accreditation and periodic institutional and study programmes accreditation reflect international recognition of the principles on which the institution's policies and procedures are based, which have a positive impact on results. To be more specific, for ensuring the highest academic standards, EUT is the only higher education institution in the country, which will be periodically reviewed internationally by the British Quality Assurance Agency-QAA.

Fifth, EUT has initiated and participated in many research projects, which have had a major impact on the community and Albanian society. This institution encourages international interactions, through the participation of students and professors in international academic discourses in our auditoriums and abroad, but also through 75 partner universities, with which we have official cooperation agreements.

All five of these factors, make me believe that EUT, which I have the honor and privilege to lead academically, is an institution that responds to the challenges of the time, responds to the new moment and, above all, responds to a generation of students who seeks another future, in another world, for another Albania.

EUT in front of EUT. Lawyer Spartak Ngjela and Liberals of the right side, 2005

The first graduation ceremony, 2009

THE GREETING OF THE ADMINISTRATOR

EUT ADMINISTRATOR
TILDI ÇADRI

Technological
innovations,
the historical
DNA of EUT

EUT is a success story, since the year 2006 it was founded until today, not only because it offers a qualitative education with modern infrastructure, but also for the enrollment and admission of local and foreign students, guaranteeing them various opportunities for their academic growth, as well as, their implementation to the labor market. The close cooperation of the European University of Tirana with prestigious institutions and companies in the country, has made possible that our students to be employed, through internships and UET is a complex organization and in terms of achieving international standards, becoming part of European Union programs, Erasmus +, other programs as well as exchanges of students and academic staff for study visits to other western universities. Our students today belong to a generation exposed to European culture and identity, and this is considered as an added value, thus acquiring a completely new personal, academic and cultural experience etc..

Technological innovations, the historical DNA of EUT not only that, thus becoming an integral part of these institutions. Informing these young people and properly guiding them in order to get integrated into a dynamic labor market, is a primary task that lies in the philosophy of our institution. The latest and most important novelty of our university is the construction of a new university campus, which will give a new impulse to the academic life, students and

the services provided, by reshaping the institution as a meeting point for all the most important stakeholders of higher education. A newly established policy of our university system is the provision of several study programs in English, the management of which requires overcoming many challenges, by creating conditions and adapt accordingly to the market demands and European best practices. This also creates opportunities for bringing foreign students closer by enabling inter-cultural exchange.

Because of its sensitiveness to the innovation, the higher education sector is among most heavily influenced by the wave of change caused by digital technology. These two years have been an unusual year especially in the education and university system, due to the pandemic, which has been a global challenge that we had to face without any hesitation. We, as an institution, follow the best practices to develop our ordinary activity even in the most special conditions, such as those created due to pandemics, by making available new channels to make the learning process more accessible, through the use of new methods and utilization of sophisticated online platforms. Because of this we are aware that innovation is historically rooted in the DNA of our university.

Behgjet Pacolli, first Honoris Causa, 2011

First seasonal school, 2012

MULTI DISCIPLINARITY 1

After thirteen years of contributing to the history of Albanian higher education, EUT comes reformed, with a restructured and “expansion” of its academic offer. Now, there are currently five EUT faculties, two more faculties added to existent three faculties, the Faculty of Technical Medical Sciences, and the Faculty of Engineering, Informatics and Architecture. Since 2018, EUT has in its academic offer +50 programs and 75 profiles, which makes it easier for the

student to make the decision but also to adapt in the market after graduation, graduating not only as a well-informed and educated student but also as a specialist in the profession, who will be an engineer of the society. The completion of the framework of EUT study fields and disciplines is an opportunity for everyone to interact with EUT for an idea, project or education, for everything that signifies the university in a democratic and developed society.

1 FOLLOW UET, IT HAS ALL THE DEGREES!

Graduation Ceremony, July 2021

After the second decade began in the 2018-2019 academic year, following the first two licensing processes, EUT broadly restructured its academic offer and complemented its range of programs by creating in its strategic project +50 study programs, spread through 5 faculties, accompanied in 75 profiles and spread over a range of 500 subjects. All this full academic offer, starting from the Faculty of Humanities, Education and Liberal Arts, the Faculty of Economics, Business and Development, the Faculty of Law, Political Science and International Relations, the Faculty of Engineering, Informatics and Architecture as well as the Faculty of Technical Medical Sciences, cover almost all fields, creating the opportunity for every student to earn the degree they want at EUT.

THE ACADEMIC STAFF 2

At an institution such as the European University of Tirana, a leader in the educational sector in Albania, among many strengths, the academic staff is the most important one.

THE BEST LECTURERS

The lecturers of EUT can really be called the best. With their publications, CVs, network and experience, they bring to the university a tradition longer than 40 years old in the higher education of Albania. They bring the experience of the academic world of Western countries, where they have completed their doctoral studies, did post-doctoral studies, gave lectures, or have participated in various experiences. Studying with the best, learning from the best, is the basic factor for having qualitative studies.

THE PARADOX OF EDUCATION

Present times are so dynamic that comparing a sciencefiction book from the 60s, in less than 50 years all the inventions contemplated in that book have been achieved and even more. So how can we solve a major paradox of

education: lecturers or teachers prepared in the past must prepare in the present the students of the future. There is only one way: to have the best, the most up to date, the most connected to the world of work and management staff, so that you can transmit to the students the experience, the dynamism and the sense of the method to solve the problems of the future that will be different from those we have today.

INTERACTIVE TEACHING

Unlike the tradition of the eastern schools, that emphasizes the reproduction of dry knowledge, EUT emphasis the analytical skills and critical thinking and also encourages the creativity and intelligence of the student. The most modern techniques and methods of teaching with high technology and audio-visual elements are used during lectures and the process of teaching. Students are encouraged to filter by themselves the information provided by the lecturers in the curricula consisting of various carefully selected materials, avoiding the use of only one textbook.

EMERITUS/SENIOR PROFESSORS

EUT, since its founding has had the priority to increase the number of Senior professors with the purpose of bringing their academic experience in the auditorium.

25+

PROFESSORS

Our professors do not only have the role of teaching in the auditorium, but they also make a great contribution in scientific research.

50+

LECTURERS

Teaching and assessment are related closely to each other. In this way the main role of lecturers at EUT is the continuous mentoring of the student throughout his/her studies.

50+

TEACHING ASSISTANTS

The combination of the young lecturers with the older ones allows students in the auditorium to receive different views about different topics.

50+

Graduation Ceremony
July 2021

CHOOSE EUT, **PRESTIGIOUS UNIVERSITY!**

Students at EUT Hall of Fame, March 2018

It's been almost 15 years since the initial idea and the official founding of EUT, and there is a story behind it: thousands and thousands of students who have passed through EUT auditoriums, more than 15,000 diplomas, more than 3 accreditation processes of which 2 international, internships and consolidated academic processes. You can find a sign of EUT everywhere! Degrees of all cycles, different social classes and 15 years of a highly consolidated form of the new tradition of private universities in Albania.

CAREER / ALUMNI

LABOUR MARKET

3

European University of Tirana has as its priority the recruitment of qualified students into the labour market, supporting and pursuing their careers step by step.

CAREER ADVISING OFFICE

It performs a range of functions closely linked with providing opportunities to the students, during their studies, building their network to easily integrate into the job market, but also pursuing their career after their studies.

WHO EMPLOYS EUT GRADUATES?

EUT students and graduates are among the most wanted in the job market. One of our strengths is the opportunity for practice, which gives an advantage in the labour market. This is a short list of those who trust our students: Private Companies / Public Administration / Media / Diplomatic Representatives / Independent Institutions.

LABOR MARKET BOARDS

A pioneering idea of the EUT is the 10-year operation of the Labour Market Boards. The boards are attached to each department and consist of 7 members, who are our former students. Labor market boards are a source of contact for employment and professional internships.

JOB FAIR

EUT organizes every year the Job Fair. It is attended by the largest companies in Albania that conduct job interviews with EUT students. About 25% of EUT students are employed in the companies that take part in the job fair.

EUT ALUMNI

At the heart of EUT's philosophy as an educational institution everything revolves around the student; knowledge and service. At EUT the triangle "administration-academic staff-student" works perfectly and for each of these parts, relevant institutions and offices for support and cooperation have been set up. "EUT Alumni" is our face in the market, the history and the future of the university. The association "EUT ALUMNI" was created on May 13, 2010. At that time there was only a small group of graduates and now there are over 11,000 Bachelor and Master graduates from EUT. All of these are the biggest university lobbyists, fundraisers, project applicants, those who generate ideas for new programs, who create job markets for the university.

DR. SOKOL NDOKA
PRESIDENT OF EUT ALUMNI

I feel privileged to be at the forefront of this mission at the institution that marked a significant turn in my life. Tirana has played an essential role in my professional and personal growth. It was precisely the experience at EUT that nurtured and shaped my ambition for further engagement in the academic field. EUT has given me a lot over the years! Therefore, today and in the years to come it is up to me to make the maximum contribution to this institution.

SHPAT KOLGEGA
WINNER OF EUT ALUMNI AWARD 13 / 2021

Shpati Kolgega, from 1 year, is the Director of the Tirana Branch at the Albanian Post, graduated in Public Relations at the European University of Tirana and also with an M.B.A in General Management at New York University in Tirana. Currently pursuing a Master's program in Eisenstadt, Austria at the University of Applied Sciences FH Burgenland. He has a professional experience of more than 11 years in journalism, politics, regional organizations and public administration.

BECOME PART OF THE EUT NETWORK!

At EUT you have the opportunity to meet, socialize, collaborate on social or professional level with thousands and thousands of students from different social classes, international contacts with hundreds of professors and in general the community of lecturers, researchers and students at EUT are very diverse. In today's networking society it is very important to belong to a community that is ubiquitous, at all levels of the public and private sectors. Studying at EUT gives you the opportunity to build professional relationships not only with thousands of students and hundreds of EUT lecturers, but also with many professionals who are part of projects, forums and open lectures. EUT has graduated over 15.000 students and more than 1,000 Albanian and foreign lecturers have been part of EUT in 15 years.

INTERNATIONALIZATION ERASMUS+

4

EUT is a higher education institution dedicated to the internationalization of study programs, academic process and staff development and research through the opportunities offered by internationalization. EUT aims to become an important national and regional center in terms of university cooperation, exchanges for scientific research and the debate of ideas that promote academic and European citizenship values. We aim to offer joint degrees with prestigious European universities, with which we have built partnerships within the framework of joint study programs. Through this office EUT has achieved successful collaboration with prestigious partner universities such as: Malardalen University, Sweden, Lappeenranta University of Technology in Finland, The Hague University of Applied Sciences in the Netherlands, Emden-Leer University

and the Hochschule Ludwigshafen in Germany; NOVA University of Lisbon in Portugal, University of Salzburg in Austria; University of Bologna, Pavia and Genoa in Italy; Central European University, Hungary, Lille University, France etc. EUT collaborates with CEU within the GTFP program to enhance teaching in English at EUT. It also offers a joint master degree in Political Science -PoSIG, with the University of Salzburg in Austria. During 2015-2019, through Tempus Sigma Agile and Erasmus + International Credit Mobility (ICM) projects, more than 250 EUT students have been granted the right to undertake study or research courses in different European universities. On the other hand, EUT is a host institution for 26 students from partner universities, who carry out one or two semesters of study at EUT in English.

FOREIGN STUDENTS

from partner universities have completed more than one semester of study at EUT in English.

50+

PARTNER UNIVERSITIES

of international level with which EUT has agreements for joint projects, scientific research and exchanges of staff and students.

125+

EUT STUDENTS

have completed more than one semester of studies at the most prestigious European universities

IV BECOME INTERNATIONAL IN UET

Ketrina Çabiri, Head of Projects and Internationalization Office, EUT

Today, studies are global. Going abroad for a study cycle, a semester or doing another study program, getting in touch with foreign professors, foreign practices, being in the audience with international students, in an increasingly global world is an advantage for EUT. The number of international exchanges of EUT, the number of EUT ALUMNI students pursuing a study cycle abroad and the number of Erasmus students, rank EUT among the universities with the highest percentage of internationalization. Projects, exchanges, Erasmus and international professors, make EUT a springboard for easier access to an international world. Former EUT students today study from Harvard and Oxford to the London School of Economics in Sorbonne and work from the World Bank to UN, from the IMF to the European Central Bank.

APPLICATIONS AND ADMISSIONS

TUITION FEES

5

Some of the most frequently asked questions about starting a degree at EUT

WHICH DOCUMENTS ARE REQUIRED FOR ADMISSION TO THE BACHELOR CYCLE?

- Notarized photocopy of high school diploma and grade certificate
- Photocopy of ID or passport
- Family or personal certificate
- Copy of tuition fee payment receipt

WHAT DOCUMENTS ARE REQUIRED FOR ADMISSION TO THE MASTER CYCLE?

- Notarized copy of first cycle diploma and grade list
- Photocopy of ID or passport
- Family or personal certificate
- Notarized copy of high school diploma and grade certificate
- Copy of tuition fee payment receipt
- Proof of foreign language knowledge (English, French, German, Italian, Spanish).

STUDY CYCLES AND THEIR DURATION

- Professional programs - 2 academic years (120 ECTS)
- Bachelor programs - 3 academic years (180 ECTS)
- Integrated programs - 5 academic years (300 ECTS)
- Professional Master - 1 academic year (60 ECTS)
- Master of Science - 2 academic years (120 ECTS)
- Doctoral Programs - 3 academic years

HOW CAN I TRANSFER AT EUT

EUT, in accordance with the principles of the Bologna Charter, accepts student transfers in intermediate years from other national or foreign university schools, public or non-public ones. The transfer of studies is carried out according to the EUT regulations, before the beginning of the academic year, within the deadlines set by the Ministry. The process of curriculum evaluation and subject recognition is done in two stages: preliminary review and final review.

DOCUMENTATION REQUIRED FOR STUDY TRANSFER

- Documentation required for admission to the relevant study cycle
- The list of grades from the transferring institution
- Photocopies of the syllabus that the student needs to equivalent his/her studies in EUT
- Certificate of deregistration from the transferring institution, including student matriculation number

FEE REDUCTION

Although EUT offers numerous scholarships, at EUT a tuition fee starts at 625 Euro. EUT offers reductions depending on the average grade of high school and instant payments for the entire study cycle, and also offers the option of paying through installments.

You are welcome to visit us at EUT

V ACCESS TO EVERYONE IN EUT

Students applying to commercial banks for financing studies with 0 interest rate

A large university is likely to build a very large scale of fees, reductions, scholarships or financial support with 0 interest. Starting from 625 Euro, you can find your place at EUT according to type of diploma, study level, asking for reductions, financial support, scholarships or financing from banks with 0 interest paid back. All of these elements make EUT accessible to everyone, making it in the same time a prestigious and dignified university and also accessible from all social classes. Practically, EUT has a financial scheme for everyone studying here, changing the perception that the private university is only the university of the rich: starting with the Pashko Scholarships, the Kadare Scholarships, the Excellence Scholarships, the Talent Scholarships, reductions based on grades and family members.

“EARLY BIRDS” PRE-REGISTRATION

“EARLY BIRDS”, pre-registrations. UET creates a 12-month relationship with its future students. It is inclined to start this relationship with prospective students, who are pursuing the final year of high school, have already completed high school, have terminated a first cycle degree programme and want to start again to study at the university level, or want to enrich their studies. Throughout the year, the Office of Admissions and Career Counseling implements an integrated career counseling process, enabling many prospective students to enroll for the next academic year at the European University of Tirana. Through fee reductions, at 30 - 40 percent, or scholarships and half-fee academic excellence scholarships, students are intitled beforehand to continue their university studies in the discipline chosen by them or meet the criteria.

500+ PROGRAMME 500 / BUSINESS PARTNERS

2

Business Day at UET. UET Open Weeks 2019, Job Fair

At UET, the 500+ program aims to enable and deepen the cooperation with the business and the labor market by offering to all these companies a wide range of services and processes related to the nature of the institution and the goals of these businesses. This project includes the 500 largest companies in the country and implies a 5-year cooperation with the intention to strengthen the cooperation with the business sector in Albania. This cooperation also aims to evaluate the performance of study programs at UET. The collaboration with these companies is considered a priority to integrate students in internships up to their employment.

UET SCHOLARSHIPS

This year, the European University of Tirana will offer 500 scholarships for high schools' seniors based on their commitment to study and academic performance. You can apply online on the official UET website: <http://uet.edu.al/apliko-per-burse/>. UET allocates a certain number of scholarships available to students every year. Currently at UET over 750 students are beneficiaries of full or partial scholarships - Excellence Scholarships, "Kadare" Scholarships for Humanities and "Pashko" Scholarships for liberal ideas. Also, UET, starting from this academic year, in the framework of the transformation into a polyvalent university, promotes programs, profiles or study cycles through half fee scholarships. Furthermore, all prospective students having an average of 9 - 9.5 of the high school grades receive a half fee scholarship and those having an average over 9.5 are awarded full excellence scholarship.

ERASMUS+ 250 / STUDENT EXCHANGES

4

Aida Breti, Coordinator of the Erasmus + Office in Albania. Activity at UET, 30 years ERASMUS

In the framework of international projects and the Erasmus + program, UET has granted scholarships at the amount of 900 thousand Euro for staff and student mobility. Through the Erasmus+ Program, over 250 UET students have gone abroad, and 32 foreign students have come to UET and have completed at least one semester. Over the years, UET has built cooperation bridges with many universities in the West and has been successfully involved in academic and scientific projects in the framework of international higher education programmes. UET has paid close attention to this process, as it is improving the study programs and the academic process in accordance with Western standards.

15 YEARS UET

15 DOCTOR HONORIS CAUSA

14+1 Honoris Causa in 15 years

Following the tradition of the well-known international universities, UET has awarded at least one to two Honoris Causa titles per year. As a form of gratitude for the life activity or acts of special interest in relation to Albania, development, science, culture, etc., UET selects Albanian or foreign personalities, political figures, scientists, lawyers, philosophers, writers or Nobel laureates and institutional figures. In the 15th academic year 2020-2021, UET awarded the 15th title to the famous poet and screenwriter, Petrit Ruka.
